Dear UCA Parents and Guardians,

During the month of May, your child will take a MAP® Growth™ test from NWEA® in English and Math on a computer or tablet. MAP Growth scores help teachers check student performance by measuring achievement and growth. Teachers use results to tailor classroom lessons and set goals for students.

MAP Growth tests are unique and adapt to your child's responses to measure your child's knowledge. If your child answers a question correctly, the next question is more challenging. If they answer incorrectly, the next one is easier. These results will provide a more complete picture of where your child is on their learning journey— regardless of whether they are on, above, or below their grade level.

Since MAP Growth tests provide immediate and accurate information about your child's learning, it's easy for teachers to identify students with similar scores in similar skills and topics and then plan instruction accordingly. MAP Growth reports also provide typical growth data for students in the same grade and subject with the same starting performance level.

We are truly excited to focus on your child's individual growth and achievement. For more information about MAP Growth, visit [NWEA.org/familytoolkit](https://nwea.org/familytoolkit).

Sincerely,

Rola Malaeb
Director
